We work with clients throughout the Northeast and deliver on time and on budget. Our event coordinators are on site to ensure a flawless execution of your event, no matter how small or large. When your event is over, you can get back to business while we take care of the equipment breakdown and return.

### Rental Architectural Light Kolorado MK3

KOLORADO MK3 1800, probably the most powerful outdoor color changer of its category, is designed primarily for external architectural lighting, combining a wide angle high power flood light with the added benefits of a CYM color changer, whereby the electronic mixing of cyan yellow and magenta dichroic filters can create virtually any desired color, to highlight any building or structure to great effect. But KOLORADO MK3 is equally at home indoors and its newly designed patented optical system giving a considerably greater light output, makes the unit highly suitable for television and film sets, live performances, exhibitions, etc. The unit have been fitted with a separate ballast to facilitate even further the access to its internal components. KOLORADO MK3 can function stand alone via a selection of in-built pre-programmed color blend sequences, with adjustable times between these, from a slow, subtle mood creating color mix through to an exciting color chase. Multiple units can be synchronized in this mode, with one unit acting as a master, or single or multiple units can be precisely controlled from five channels of standard DMX 512. Control set up is simplified by the on board LED display and push button setting. The aluminum and galvanized steel body and the scratch resistant polyurethane paint are part of a housing design, which is fully weatherproofed

DIMENSIONS

620MM x 623MM x 820MM

WEIGHT
